

## What have we achieved?

### **Culturally?**

- We (the Danish) have learned more about this town of Höfn and history and background of Höfn and the mountains. And that the Icelanders sort the garbage much more.
- that Denmark is more fashionable, and much more people and much more diversity. Bike more. That they are also legally allowed to drink alcohol at 16.

### **Socially?**

- That it is easy for Icelanders to get to know other people even though there is an age difference, and the (Icelanders) do a lot of things and are more active.
- Denmark is closer, they all hug and kiss and say good night to each other

### **Geographically?**

- The Danish have learned about the mountains and that it is just the opposite of Denmark
- Lot of older houses in Denmark, more growing lands and smaller houses

### **Communicational?**

- That Icelanders talk very fast.
- That the language is very soft.

### **The UN goals?**

- That they are very important, and we should do our best at following them.

### **Future?**

- More and better social skills and recycle.
